

# MOSO® topbamboo versatile and easy to install

\* New: Topbamboo Antique Grey

# topbamboo

versatile and easy to install

MOSO® Topbamboo consists of a top layer of solid bamboo combined with a HDF (High Density Fibre board) core and a softwood backing layer. Because of this 3-ply structure, the product is **very stable**, while the click system (Uniclic®), makes it very **easy to install** (no glue needed). Topbamboo is available in a **large variety** of fashionable **colours and finishes**, including brushed and aged versions.

# discover the topbamboo benefits

## hard & durable

With a top layer that matches or exceeds the hardness and density of hardwood species such as Oak, Topbamboo is even suitable for high traffic applications, especially in the High Density\* version.

## high stability

Because of the special composition, Topbamboo will shrink and swell less than solid wood species, providing a more stable floor.

## easy to install

Because of the click system (Uniclic®) the Topbamboo boards are very easily connected without the use of glue.

## healthy

As a product from nature, Topbamboo floors are anti-static and anti-allergic, and facilitate a healthy indoor environment.

## natural beauty

Inspired by nature, Topbamboo is not only a conscious choice but also a stylish one.

## endless resource

With a growing speed of up to 1 meter per day, Moso bamboo is the fastest growing plant on earth.

## vast choice

Topbamboo is available in a large variety of finishes, styles and colors to cater to anyone's preferences.

## warranted quality

Topbamboo floors are of the highest quality and come with a product guarantee of 10 years.
